Modular RFID cabinets
Understanding Inventory tracking
Finally smart enough!

Beautiful, functional intelligent furniture, built by Medstor and powered by PJM SATO. Perfect partners for the management of consignment stock offering inventory tracking from the point of despatch to the point of use that is 100% accurate, every time.

Featuring bench top, mid level mobile and full height mobiles, units can be built and configured to offer the very best in space utilisation and product protection.

The Medstor Modular solution is HTM71 compliant, offers Kanban and FIFO as standard and is now available with built in real time intelligent expiry management.

CONTINUOUS WORK-FLOW

Thermal Printer

PJM Tunnel Reader

Desktop and free-standing mobile cabinets Fitted with Medstor ISO system

On- demand Tag issuing, streamline creation of encoded PJM tags. Integration possible with any ERP: System verifies successful encoding before printing, marking any defect tags.

Mass scale product reading with PJM Tunnel, integrated PJM Oribit: Reads hundreds of items in seconds. Uniquely identifies each item as it's shipped or received; 100% accuracy with speedy 360°reading.

Implant tracking solutions; WiFi enabled RFI carts at the point of use. Allows pre-authorised access for product retrieval when needed. Stock usage and replacements are recorded in real time, including expiry management and advanced shipping notice.

Real time solutions with remote viewing via your android devices.

Code	W (mm)		D (mm)		H (mm)	Description
MCSATO2001	760	x	625	x	820	RFID desktop unit
MCSATO1001	760	x	625	x	1655	RFID mobile cabinet
MCSATO3001	760	x	625	x	1825	RFID mobile cabinet
